

# YTEN Path to Trait Commercialization: Crop Development Stages

Advanced Technologies and New Regulatory Path Significantly Accelerate Trait Discovery and Path to Market

## Regulated Trait: 6-8 years

### Novel Trait Discovery

- Identify gene targets using GRAIN platform
- Test candidate genes in plants (e.g. Camelina platform, switchgrass model, rice)
- Select lead genes/traits for development
- Determine target crops
- Select development path

## Non-regulated Trait: 3-5 years
